Liska's EncycVulpedia: Foxes Around the World Foxes Around the World . Besides the four (or five) North American species of fox already mentioned, sixteen other species of fox exist worldwide. There is still debate over the taxonomic classification of many foxes. Red Fox - NYS Dept. of Environmental Conservation Red fox are the most widely distributed carnivore in the world, and are known to occur in nearly every county of New York State. Preference is given to open country, with an aversion to open landscapes devoid of vegetative cover or deep forests. Fox - Wikipedia A fox's dentition, like all other canids, is I 3/3, C 1/1, PM 4/4, M 3/2 = 42. (Bat-eared foxes have six extra molars, totaling in 48 teeth.) Foxes have pronounced carnassial pairs, which is characteristic of a carnivore. These pairs consist of the upper premolar and the lower first molar, and work together to shear tough material like flesh.

7 Of The Most Beautiful Fox Species In The World | Bored Panda The red fox (*Vulpes vulpes*) is what usually comes to mind when you hear the word "fox," which makes sense since it can be found throughout the Northern hemisphere. But this diverse and adaptive genus has species all over the world, all of which are especially adapted to thrive in their environments.
